## STEREODIRECTED SYNTHESIS WITH ORGANOBORANES

Book Condition: New. Publisher/Verlag: Springer, Berlin | This chapter provides a brief overview of organoborane reaction types. Reaction mechanisms are discussed, particularly with reference to whether they may or may not allow stereocontrol, but stereocontrolled applications are deferred to later chapters. Reactions that replace boron by atoms other than carbon are discussed first (Section 3.2), followed by boron substituted carbanions (Section 3.3) and reactions that have the net effect of replacing boron-carbon bonds by carbon-carbon bonds (Section 3.4).
