

Climatic Variations and Forcing Mechanisms of the Last 2000 Years

Filesize: 7.54 MB

Reviews

A high quality pdf as well as the typeface applied was exciting to see. It really is written in simple words and phrases rather than difficult to understand. You will not really feel monotony at any time of your time (that's what catalogs are for relating to in the event you question me).

Condition: New. Publisher/Verlag: Springer, Berlin | Proceedings of the NATO Advanced Research Workshop "Climatic Variations and Forcing Mechanisms of the Last 2000 Years", held at Il Ciocco, Lucca, Italy, October 3-7, 1994 | A profound knowledge of the past climate is vital for our understanding of global warming. The past 2000 years are both the period which is of most relevance to the next century and that for which there is the most evidence. High-resolution proxy records for this period are available from a variety of sources. Five sections consider dendroclimatology, ice cores, corals, historical records, lake varves, and other indicators. The final two sections cover the histories of various forcing factors and attempt to bring together records from a variety of sources and provide explanations. | Section A: Dendroclimatology.- Tree-Ring Variables as Proxy-Climate Indicators: Problems with Low-Frequency Signals.- Tree-Ring Density Networks for Climate Reconstruction.- Millennial and Near-Millennial Scale Dendroclimatic Studies in Northern North America.- Reconciling the Glacial and Dendrochronological Records for the Last Millennium in the Canadian Rockies.- Multimillennial Dendroclimatic Studies from the Western United States.- Large-Scale Climatic Influences on Baldcypress Tree Growth Across the Southeastern United States.- Inter-Decadal Climate Oscillations in the Tasmanian Sector of the Southern Hemisphere: Evidence from Tree Rings over the Past Three Millennia.- Interdecadal Climatic Variations in Millennial Temperature Reconstructions from Southern South America.- Section B: Ice Cores.- Frequency Analysis of an Annually Resolved, 700 Year Paleoclimate Record from the GISP2 Ice Core.- Climate Reconstruction from Water Isotopes: What do we Learn from Isotopic Models?.- Climate Changes in the Atlantic Sector of Antarctica Over the Past 500 Years from Ice-Core and Other Evidence.- Holocene Climate Changes Recorded in an East Antarctica Ice Core.- Climatic Changes for the Last 2000 Years Inferred from Ice Core evidence in Tropical Ice Cores.- Inter-Comparison of Ice Core ?180...
