If the crew of the Super Small Miniaturized Nano-like Operations Wessel S. S. Minnow fails to destroy the inoperable anti-capitalist coagulum lodged in Morris Moore s progressive brain, how will General De Klein s Federal Department of Antidotes operatives at SUCFACE Mission Control find out if Leftylometazoline (aka LeftX) really works? Would this usher in the final stage of the liberal clerisy s clandestine collectivist conspiracy to abolish our few remaining individual freedoms forever? That would not please President Thump one microscopic little bit. Join Major Miles Stone and his disturbingly alluring crew on their miniaturized mission through the left and lefter hemispheres of the progressive brain. Their fantastic voyage is a race against time that takes them through such redoubtable regions as the Clinton Vortex, the Che Guevara Gray Area and the Obama Trauma Center itself. Here they bravely confront such anatomical monstrosities as the fantasist frontalis, the hyperbolthalamus and the dreaded pious aspiration node. Their progressive brain journey only gets progressively worse as they are repeatedly attacked by repulsive swarms of nanny neurons, doomsday dendrons, robin hoodlums and the formidable radical egalitarian bacterium. If not for the courage of the fearless crew, and their deadly arsenal of passing phasers, millennial mindset missiles, moral busybody antibodies and Condescendum(R), the Minnow would be lost. The Minnow would be lost. The tension never stops building during this thrilling tale of adventure, danger, suspense and romance. And lust. Will Captain Hanna Grenada s irresistible animal magnetism finally seduce the Major into experiencing something vaguely resembling basic human emotion? Can the all too communicative HAL 9999 super computer and his annoying eye drones really be trusted to operate the ship?...
