Forgotten Books, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Mr. Goschen s Scheme for Reform of the Bank Acts: An Address Delivered to the Institute of Bankers in Scotland, January 7th, 1892 I propose to offer you some remarks on Mr. Goschen s address of the 2nd December, in which he has further developed his plans for the reform of the Bank Acts. On this occasion he has devoted himself exclusively to the question of increasing the central stock of gold by means apart from the reserves of bankers, and he has explained in some detail how he hopes to accomplish this by an issue of one-pound notes. He also aims at introducing a slight amount of elasticity into the Acts. The scheme presents several points requiring serious consideration, and, while it is to be earnestly desired that Mr. Goschen s main object, - the adding to the gold reserves, - may be completely attained, it is necessary to see that the plan is based on principles that are sound and practicable, or the result may be an increase of weakness rather than of strength.
