

Nanomaterials and Nanoarchitectures: A Complex Review of Current Hot Topics and their Applications (Paperback)

By -

Springer, Netherlands, 2015. Paperback. Condition: New. 1st ed. 2015. Language: English . Brand New Book. The current work consists of nine contributions describing recent progress in the interdisciplinary of Nanoscience, which involves physics, chemistry, engineering, biology and medicine and one essay outlining some important historical and socioeconomic factors pertaining to recent developments in nanoscale science and technology. All 10 chapters have been written by eminent experts in their respective fields. The authors employ the terms `nanomaterials as building blocks of a range of materials, `nanoarchitecture represents the design and `nanotechnology the means to produce a particular device or functionality. Two of the chapters are devoted to novel materials and two others focus on analyzing techniques, which can be used to enable molecular control of the film architecture. Additionally, the reader will find material devoted to photonic and hybrid plasmonic-photonic crystals as well as sections which address their applications, such as the use of plasmonic particles and nanostructures for new sensing concepts and ultrasensitive detection techniques. This work will be of interest to graduate students, researchers and practitioners alike.
