By Kadam, Vishwas / Suvarna, Prashant

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | History to its classification, diagnosis, microbiology, pathology, imaging, and treatment | In this book "Osteomyelitis of the jaws", after a brief introduction, various terms associated with osteomyelitis have been described. A broad and varied classification is given based on various modalities that include etiology, pathogenesis, clinical picture, radiology and histopathology. In accordance to this classification, complete microbiology and histopathology of osteomyelitis is covered. Furthermore in diagnostic imaging, conventional and advanced imaging techniques like CT, MRI, Scintigraphy and PET scan have been discussed. The therapeutic part covers the interdisciplinary planning of the management of osteomyelitis which includes a microbiologist, an infectious disease specialist and a maxillofacial surgeon. Depending upon microbiology, precise antibiotic regimen for complete eradication of the micro organisms is tabulated, followed by a meticulous surgical rehabilitation of the jaws. In the final segment importance of hyperbaric oxygen as an adjunct to the therapy and osteomyelitis affecting the temporomandibular joint is covered. This book covers osteomyelitis from the history to its classification, diagnosis, pathology, imaging, and treatment in a simplified manner. | Format: Paperback | Language/Sprache: english | 96 pp.
