

## The Messenger of Mathematics Volume 25

Filesize: 2.37 MB

### ***Reviews***

*This ebook is very gripping and fascinating. Sure, it is engage in, nevertheless an amazing and interesting literature. It is extremely difficult to leave it before concluding, once you begin to read the book.*

*(Ms. Ora Buckridge)*

## THE MESSENGER OF MATHEMATICS VOLUME 25

To get **The Messenger of Mathematics Volume 25** PDF, remember to refer to the button below and save the document or get access to other information which might be in conjunction with THE MESSENGER OF MATHEMATICS VOLUME 25 book.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1896 Excerpt: .we have  $\sin \theta \sin \phi = \sin \alpha \cos \beta$ ,  $\cos \theta \cos \phi = \cos \alpha \cos \beta$ ,  $\sin \theta \cos \phi = \sin \alpha \sin \beta$ ,  $\cos \theta \sin \phi = \cos \alpha \sin \beta$ , the last of which is deducible from the first three. These four relations are exactly the same as the relations in a spherical triangle having  $\theta$  for its hypotenuse and  $\alpha$ ,  $\beta$  for its sides. Each of the remaining six relations, derived from Napier's rule, between the sides and angles of a spherical triangle involve the remaining angle, that is, the angle corresponding to the spheroidal longitude  $\alpha$ ; the analogy is therefore, in this regard, limited to the above set of equations. which are equations characteristic of such functions. It therefore follows that  $\alpha$  and  $\beta$ , or periodic functions of  $\alpha$  and  $\beta$ , cannot be expressed in finite algebraical terms as either elliptic functions of  $u$  or periodic functions of  $u$ ; but some functions of  $\alpha$  can be expressed as transcendental trigonometrical functions of  $u$ . Again, as  $u$  increases from  $0$  to  $K$ , the quantity can be represented by a point moving positively round a semicircle, of radius unity and centre the origin, from the point  $1$ , where  $u = 0$ , to the point  $-1$ , where  $u = K$ ; hence its argument increases by  $\pi$  as  $u$  increases from  $0$  to  $K$ . And similarly the argument increases by  $\pi$  whenever  $u$  increases continuously as a real quantity by  $K$ . 12. Let the geodesic be continued round the spheroid: where by this...
