Scientifically Grounded Practices for Healing and Transformation Modern neuroscience shows that what we do and think can change the physical structure of the brain yet often this occurs unconsciously, when we habitually react to stress in unhealthy ways. Lisa Wimberger created Neurosculpting(r) as a complete approach for consciously reshaping our brains for greater happiness, health, creativity, and compassion. Through her groundbreaking work with first-responders, Lisa Wimberger has discovered which practices have the greatest success for creating positive change at the neurological level.
