

## Unified Model of Universe and the Atom

By Seshavatharam, U.V.Satya / Lakshminarayana, S.

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Avogadro's Gravity for Nuclear Interactions | Modern physicists are seriously trying to couple quantum mechanics and general theory of relativity. Even some scientists are trying to formulate a quantum theory of gravity. The subject of black hole physics is still under development. Accelerating model is putting all the scientists in a dilemma. Large number hypothesis or string theory or SUSY or quantum gravity or SM no model is throwing light on the secrets of fermi scale&#39;s atomic and gravitational unification. Now a days particle physicists are trying their level best in estimating the strong coupling constant&#39;s QCD is a highly complicated model. Scientists are spending million dollars on particle accelerators, super novae observations and dark energy probing projects. In this critical, highly sensitive and most expensive situation authors made a simple (theoretical) attempt to understand the secrets of cosmology, grand unification and Avogadro number. Even though the proposed atomic gravitational constant&#39;s is having a large value it is naturally coupling the observed atomic, nuclear and particle physics constants accurately. Authors humbly request the whole science community to kindly look into this new approach. | Format: Paperback | Language/Sprache: english | 176 pp.

### Reviews

*These sorts of book is the best book offered. I have got read and so i am sure that i will planning to read yet again once more in the future. Its been written in an exceedingly basic way which is merely after i finished reading through this publication in which really altered me, change the way in my opinion.*

*-- Miss Estella Pfannerstill*

*A fresh eBook with a new standpoint. We have read through and that i am certain that i am going to going to read through again once more later on. Your life period is going to be transform as soon as you comprehensive reading this article book.*
