The answer is ABC; a language that was designed on a clean sheet with the goal of delivering an easy-to-use language ideal for teaching and learning about programming. . ABC is more readable than other languages, and has no obscure commands. . It is more concise than other languages; equivalent programs written in C are five times as long. . It is more powerful than other languages; its perfect choice of high-level data types make it an ideal tool for serious programming. . ABC was one of the inspirations for the Python programming language and Python shares key ideas and features of ABC.
