Relentlessly Creative Books, United States, 2015. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.In the past, imaginative geniuses made great accounts of their philosophies, so we know they embraced both the nature of things and how to observe the world broadly. In recent centuries, however, we have subjected the phenomenon of nature to specialization. While there is something gained from a narrow focus, in the development of exquisite technologies, the big picture is frequently forgotten and unwitting undertakings such as climate engineering, are pursued. With supporting interviews by Dr. Gerald Pollack (Institute of Venture Science), Dr. Mae Wan Ho (epigenetics), John Stuart Reid (cymatics), MJ Pangman (structured water) and Daniel Schmidt (meditation), *Conceptual Revolutions in Science* delivers a thoroughly innovative book that follows a path to explore nature's imagination, as past imaginative geniuses have done, to establish meaningful connections and enable powerful conceptual revolutions to take hold. By providing a modern scientific framework from which to observe the world, *Conceptual Revolutions in Science* offers an incredible adventure to expansive knowledge that will be on your mind the minute you wake up, and drive your actions throughout the day. Together we'll explore the established evidence and remarkable connections regarding the new science of epigenetics, sound energy, extremely low electromagnetic frequencies, meditation, structured water and more. You'll learn how far your reality can be stretched, to go beyond your senses, and examine your personal insights and what it takes to enhance your mission within this Universe. Take this challenge personally by following in the footsteps of past imaginative geniuses and your worldview will be amplified exponentially along the way.
