

control system simulation and CAD

Filesize: 6.75 MB

Reviews

Complete information for publication enthusiasts. I have go through and that i am confident that i will gonna go through once more again in the future. Its been printed in an exceptionally basic way and is particularly just following i finished reading through this book by which basically altered me, alter the way i really believe.

paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 244 Publisher: Machinery Industry Press. Pub. Date :2010-02. This book outlines the simulation technology in the development process. based on the MATLAB language for the platform. the systematic exposition of the basic concepts of digital simulation techniques. principles and methodology. summarizes the analysis and design of control systems the basic content. The book chapters. including: the control system of the experimental method. the mathematical description of the system and model. digital simulation of the implementation. the control system and its integrated application of CAD content. The book involves motion control. process control. electromagnetic and power electronic control systems modeling. analysis and design. its content a simple and highly readable; each chapter has a problem and to explore section. with a practice type. analysis and design-based and inquiry-based exercises to help stimulate student interest. develop technologies. to enable readers to understand and master the relevant areas of content. This book automation undergraduate institutions of higher learning with teaching materials can be used as electrical engineering and automation. mechanical design and manufacturing and automation expertise. Simulation Technology class curriculum book. Contents: Preface the first section a control system of the experimental method. analytical method two. three experimental methods. simulation experiment simulation experiment II classification and performance comparison of one model category by two types of classification by the computer Section III systems. models and digital simulation of a system of composition and classification of two. model and importance of three basic elements of digital simulation IV control system with digital simulation software for a cad. cad technology. the general concept of two. The main contents of the control system cad Third. the digital simulation software for the application of section...
