Why do people get addicted to alcohol, cocaine, methamphetamine, marijuana, prescription medications, and other drugs The McAuliffes give a simple, yet profound, answer - LOVE. They define chemical dependency as a committed pathological love relationship of a person to a mood-altering chemical substance, a psychoactive drug, in expectation of a rewarding experience. The McAuliffes book reflects the results of lives dedicated to the pursuit of a comprehensive understanding of addiction and recovery of the whole person. The brilliance of The Essentials lies in its ability to incorporate multiple theoretical and technical disciplines while unifying these various perspectives by adding clarity and focus. It is a foundational book for every practitioner and educator in this field. Scot Adams, Ph. D. Director of Services, Nebraska Department of Health and Human Services The Essentials of Chemical Dependency provided the first truly holistic approach to chemical dependency. Their work instills confident hope for recovery.
