Reviews

Very useful for all group of people. It is amongst the most incredible pdf i actually have read through. Its been written in an extremely straightforward way and it is just right after i finished reading through this pdf by which basically modified me, change the way i think.
(Felicia Nikolaus)

22105 PIRKO (PAPERBACK)

Crypt Publishing, Mauritius, 2012. Paperback. Condition: New. Language: English . Brand New Book. Please note that the content of this book primarily consists of articles available from Wikipedia or other free sources online. 22105 Pirko (provisional designation: 2000 LS36) is a main-belt minor planet. It was discovered through the Lowell Observatory Near-Earth-Object Search at the Anderson Mesa Station in Coconino County, Arizona, on June 11, 2000. It is named after Richard G. Pirko, an astronomy educator at Youngstown State University in Youngstown, Ohio. Asteroids (from Greek star and like, in form) are a class of Small Solar System Bodies in orbit around the Sun. They have also been called planetoids, especially the larger ones. These terms have historically been applied to any astronomical object orbiting the Sun that did not show the disk of a planet and was not observed to have the characteristics of an active comet, but as small objects in the outer Solar System were discovered, their volatile-based surfaces were found to more closely resemble comets, and so were often distinguished from traditional asteroids.
