Millbrook Press, United States, 2003. Paperback. Condition: New. Gustav Moore (illustrator). Language: English . Brand New Book. The Earth is round like a ball and it moves in circular motions. It changes in patterns that go round and round like the wheels of a bike. So begins EARTH CYCLES, a book that describes three of the cyclical phenomena created by the movement of Earth. Day to night to day and back again is one cycle, and the cycle of the moon gradually moving from a sliver to a giant disk and back again is another. The seasons never-ending cycle of spring to summer to fall to winter to spring again is the third. The book offers the scientific reason behind each of the cycles while at the same time providing an overview of the wondrous order of our planet.
