Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from On the Course of Collegiate Education Adapted to the Circumstances of British America: The Inaugural Discourse of the Principal of McGill College, Montreal It is of course altogether unnecessary in addressing such an audience as the present, to dwell on the value of education in general. All who hear me will admit without hesitation that mental and moral culture are the only true foundations of the usefulness, prosperity, and greatness of individuals and of nations, and that no department of the social machine should be more jealously watched, more highly esteemed, or more liberally supported, than that which professes to train for a successful entrance on the business of life, those who will be the men and women of a few years hence. Nor need I insist on the truth that, in young and growing countries, where all is in a state of growth and transition, where boundless industrial resources are waiting to be drawn forth, where new social and political institutions are to be built up; and above all in a free country, where every one must think and act for himself in the most important concerns of life, and where any one, however humble his original position, may rise to places of the highest trust and influence, we should be content with nothing less than the highest possible education of the greatest possible number.
