Brand New Book ***** Print on Demand *****.Excerpt from An Integral Representation of the Electromagnetic Field in the Image Space of an Optical System It would appear that more refined methods are needed for the treatment of such problems. Development of more powerful methods also seem desirable because of problems which arise in the related field of optics of microwaves. Microwave systems frequently employ numerical apertures which are considerably larger than those encountered in systems transmitting light, and it is not always clear to what extent the usual methods can be used with confidence [cf. Bachynski and Bekefi, Moreover, in microwave optics the knowledge of the state of polarization of the image field is of direct interest.
