## PRACTICAL STATISTICS FOR FIELD BIOLOGY (2ND REVISED EDITION)

To get **Practical Statistics for Field Biology (2nd Revised edition)** PDF, you should access the web link listed below and download the ebook or get access to additional information which are highly relevant to PRACTICAL STATISTICS FOR FIELD BIOLOGY (2ND REVISED EDITION) book.

John Wiley and Sons Ltd. Paperback. Book Condition: new. BRAND NEW, Practical Statistics for Field Biology (2nd Revised edition), Jim Fowler, Lou Cohen, Phil Jarvis, Provides an excellent introductory text for students on the principles and methods of statistical analysis in the life sciences, helping them choose and analyse statistical tests for their own problems and present their findings. An understanding of statistical principles and methods is essential for any scientist but is particularly important for those in the life sciences. The field biologist faces very particular problems and challenges with statistics as "real-life" situations such as collecting insects with a sweep net or counting seagulls on a cliff face can hardly be expected to be as reliable or controllable as a laboratory-based experiment. Acknowledging the peculiarities of field-based data and its interpretation, this book provides a superb introduction to statistical analysis helping students relate to their particular and often diverse data with confidence and ease. To enhance the usefulness of this book, the new edition incorporates the more advanced method of multivariate analysis, introducing the nature of multivariate problems and describing the techniques of principal components analysis, cluster analysis and discriminant analysis which are all applied to biological examples. An appendix detailing the statistical computing packages available has also been included. It will be extremely useful to undergraduates studying ecology, biology, and earth and environmental sciences and of interest to postgraduates who are not familiar with the application of multivariate techniques and practising field biologists working in these areas.
