GENETICS OF GARDEN PLANTS (FOURTH EDITION)

[DOWNLOAD PDF](#)

Biotech Books/Daya Publishing House, 2004. Hardcover. Condition: New. 4th edition. The aim of this book is twofold: first, to give an introduction to the essential principles of genetics and cytology, and secondly, to give an account of recent results in relation to horticulture. The science of genetics has a wide horticultural application; it is of value to the plant-breeder, seeds-man and gardener in providing a detailed knowledge of variation and heredity, and guidance in the maintenance of purity in their stocks. Genetics may also be of value to the nurseryman whose business lies in the vegetative reproduction of plants. Our knowledge of the genetics of polyploids has been largely developed from investigations with horticultural plants, hence the genetics of garden plants is of direct interest to the student of genetics as well as of use to the plant-breeder and horticulturist. The book describes principles as simply as the technicalities of subject will allow, illustrating them with typical examples from a range of flowers, fruits and vegetables, and to give reference to the original sources of information which may be of interest to the scientists or students. The book will serve as an introduction to the science of genetics and particularly in its application to horticulture. Contents; Chapter 1: The Genetics of Diploid Plants, Reproduction, Genetics, Cytology, Heredity, The gene, Dominance, Segregation, Pure lines, Incomplete dominance, Mendelian ratios, Complementary genes, Interaction of genes, Lethal genes, Multiple allelomorphs, Linkage, Qualitative and quantitative characters, Extra-nuclear inheritance; Chapter 2: The Cytology of Diploid Plants, The chromosomes, Mitosis, Meiosis, Germ-cell formation and fertilisation, The genes, Linkage, Crossing-over, Linkage in Zea mays, Chromosome arrangement; Chapter 3: The Cytology and Genetics of Polyploids, Aneuploids, The origin of polyploids, The auto-polyploid, The Allo-polyploid, Secondary polyploids, Secondary association, Polyploids and segregation, Chromatid segregation, Multiple genes, Hybridisation and polyploidy, Asexual reproduction, Apomixis, Parthenogenesis, Vivipary; Chapter...
