

Elementary Principles of Electricity and Magnetism; For Students in Engineering

Filesize: 8.06 MB

Reviews

The ebook is straightforward in go through preferable to recognize. It typically does not charge too much. Its been designed in an exceptionally straightforward way and it is just following i finished reading this book where basically altered me, affect the way i really believe.

(Dr. Reta Murphy)

ELEMENTARY PRINCIPLES OF ELECTRICITY AND MAGNETISM; FOR STUDENTS IN ENGINEERING

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1913 Excerpt: \cdot to r and dl . $ddf =$ element of field at P due to current in dl . $\phi_x =$ angle between $d3C$ and the X axis. b_x be the X component of f . $d3f_x = a i cc dl la oc \sin \phi$ (225) By definition. By experiment. By experiment. By experiment. (228) $9f_x = k f 1 Smg CS$ ---/o The unit of current is called the electro-magnetic unit of current if the unit of length is the centimeter, the unit of intensity is the electro-magnetic unit of intensity, and the constant, k , is equal to one. . In electromagnetic units: (229) $df_x = -f \sin \cos V_x dl$ An illustration of unit current, in the electro-magnetic system, is such a current that, in unit arc of unit circle it produces unit field at the center. The practical unit of current is called the ampere and is defined as one tenth of the electro-magnetic unit of current. One ampere = (10) 1 e.m.u. of current. or (Number of amperes) $(IO) 1 =$ (Number of e.m.u. of the same current). Equations similar to (229) can be written for components along the other axes. See appendix on International Units. Thus the resultant field at any point for any conductor may be completely determined in magnitude and direction. Usually the X axis may be taken in the direction of the resultant field so that equation (229) is sufficient. Field at the Center of a Circular Conductor.--Let ABC , Fig. 42, be a, circular conductor of radius...
