OPALESCENCE AND THE FUNCTION OF BORIC ACID IN THE GLAZE (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, 2018. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Opalescence and the Function of Boric Acid in the Glaze M r. Bleininger: It will be noticed that the results of the work, porosity and di-electric strength, are not referred to the chemical composition but to the percentages of clay, feldspar and quartz. The chemical composition has been used for the purpose of classification for which purpose I maintain that it is closer to the facts than any hypothetical mineral composition. Mr. Purely: There is one other point in that connection. Of course, in the bodies we do not completely fuse the mix. Such a procedure would result in distorted ware. Synthetically made porcelain, unless made from fritted or calcined material, will not be of the same sort as those porcelains you have exhibited here. I have seen porcelain glazes attempted synthetically. They were failures. The same would be true in porcelain bodies. While working in a porcelain tile factory, I attempted the duplication of certain French porcelain on basis of chemical composition. I failed. The same can be said for any ceramic body and nearly all of the alkaline earth glazes. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
