

Ambient Assistive Health and Wellness Management in the Heart of the City

By Mounir Mokhtari

Springer-Verlag GmbH Jun 2009, 2009. Taschenbuch. Condition: Neu. Neuware - We are living in a world full of innovations for the elderly and people with special needs to use smart assistive technologies and smart homes to more easily perform activities of daily living, continue social participation, engage in entertainment and leisure activities, and to enjoy living independently. These innovations are inspired by new technologies leveraging all aspects of ambient and pervasive intelligence with related theories, technologies, methods, applications, and services on ubiquitous, pervasive, Aml, universal, mobile, embedded, wearable, augmented, invisible, hidden, context-aware, calm, amorphous, sentient, proactive, post PC, everyday, autonomic computing from engineering, business and organizational perspectives. In the field of smart homes and health telematics, significant research is underway to enable ageing and disabled people to use smart assistive technologies and smart homes to foster independent living and to offer them an enhanced quality of life. A smart home is a vision of the future where computers and computing services will be available naturally and unobtrusively anywhere, anytime, and by different means in our daily living, working, learning, business, and infotainment environments. Such a vision opens tremendous opportunities for numerous novel...
