Cambridge University Press. Paperback. Condition: New. 175 pages. How did England, once a minor regional power, become a global hegemon between 1689 and 1815 Why, over the same period, did she become the worlds first industrial nation Gary W. Cox addresses these questions in **Marketing Sovereign Promises**. The book examines two central issues: the origins of the great taxing power of the modern state and how that power is made compatible with economic growth. Part I considers Englands rise after the revolution of 1689, highlighting the establishment of annual budgets with shutdown reversions. This core reform effected a great increase in per capita tax extraction. Part II investigates the regional and global spread of British budgeting ideas. Cox argues that states grew only if they addressed a central credibility problem afflicting the Ancien Rgime - that rulers were legally entitled to spend public revenue however they deemed fit. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
