

## Fisheries Biotechnology

By W.S. Lakra, S.A.H. Abidi, S.C. Mukherjee & S. Ayyappan (Eds)

Narendra Publishing House, 2008. Hardcover. Condition: New. Millions of people around the World are dependent for the protein and other nutritional requirements on the fisheries sector. It is now realised that Natural Ocean and Freshwater fisheries are being harvested to near their limit and the increased demands can only be met through diversification and application of modern tools. Hence, much greater emphasis has to be given on biotechnology applications to aquaculture and fisheries. Biotechnology in fisheries and aquaculture represents a range of Technologies that present opportunities to increase growth Rate in farmed species, to improve Nutrition of aquafeeds, to improve Fish health, to help restore and protect environments, to extend the range of aquatic Species and to improve Management and conservation of wild stocks. Agriculture and other universities, fisheries colleges, national laboratories and even some NGOs have initiated programmes related to Research and Teaching of fisheries biotechnology. Unfortunately, there is a great dearth of standard reference or text Books on the subject. This publication serves the long needed and fast growing requirement in the discipline of fish biotechnology. It is hoped that the treatise will prove to be extremely useful to fisheries graduate and postgraduate students, researchers, scientist and Teachers...
