Spinoff 1997

By National Aeronautics and Administration

Createspace, United States, 2014. Paperback. Book Condition: New. 279 x 216 mm. Language: English . Brand New Book ***** Print on Demand *****.Since 1973, this publication has provided you with examples of products and services developed as a direct result of the transfer of NASA developed technologies to private industry. Then-we featured fire retardant materials; now-we talk about non-invasive cardiac monitors. Then-we reported about air pollution detection devices; now-we discuss sensors for environmental control. Then-we heard about vitreous carbon materials to be used for prosthetics; now-we design major propulsion systems used in the development of energy saving jet engines. Research and development in such areas as microcircuitry, fiber optics, enhanced imaging, material processing-to name just a few-has generated technology for decades. It is available to private industry in a vast storehouse easily accessible through NASA s Commercial Technology Network. The application of NASA technologies by the private sector increases productivity through the development of new products and processes that meet consumer demands; in turn, this benefits the national economy, industrial efficiency and human welfare. At the same time, it helps meet international challenges and aid U.S. industry to stay globally one step ahead of every scientific and technological innovation. The...
