

Advanced Relativity: Bijective Physics (Paperback)

Filesize: 9.15 MB

Reviews

This composed ebook is wonderful. It really is written in basic words rather than hard to understand. You may like the way the writer compose this pdf.

(Ryder Nolan)

ADVANCED RELATIVITY: BIJECTIVE PHYSICS (PAPERBACK)**DOWNLOAD**

Createspace Independent Publishing Platform, United States, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Advanced Relativity is based on elementary perception and bijective function of set theory. We can observe in the universe five fundamental elements: matter, energy, space, run of changes and time. The one who observes these five elements is the observer which represents the sixth fundamental element. These six elements represent set universe X. In Advanced Relativity, each of these elements is related by bijective function of set theory with exactly one element in the set universe model Y. Between the set universe X and the set model universe Y there is a bijective function. Advanced Relativity is the begging of Bijective Physics where no element in the set universe model Y can be introduced without being observed with elementary perception. Bijective Physics has proved that space has physical properties, namely, variable energy density which generates mass and gravity. The energy of space is dark energy. A photon is the wave of space. In Advanced Relativity, space is the medium which transports mass, gravity, and electromagnetism. No signal can move in time because time is merely duration of signal motion in space. CMBR cannot have the origin in some remote physical past which is non-existent. CMBR has the origin in space in which is always NOW. Advanced Relativity is the end of Big Bang cosmology model. In Advanced Relativity is fully realized Einstein s idea of completeness of a given model and his visionary vision that only NOW exists: there is something essential about the NOW which is just outside the realm of science. People like us, who believe in physics, know that the distinction between the past, present, and future is only a stubbornly persistent illusion. Albert Einstein.
