By Sonia Livingstone

Is the internet really transforming children and young peoples lives Is the so-called digital generation genuinely benefiting from exciting new opportunities And, worryingly, facing new risks This major new book by a leading researcher addresses these pressing questions. It deliberately avoids a techno-celebratory approach and, instead, interprets childrens everyday practices of internet use in relation to the complex and changing historical and cultural conditions of childhood in late modernity. Uniquely, Children and the Internet reveals the complex dynamic between online opportunities and online risks, exploring this in relation to much debated issues such as: Digital inclusion Learning and literacy Peer networking and privacy Civic participation Risk and harm Drawing on current theories of identity, development, education and participation, this book includes a refreshingly critical account of the challenging realities undermining the great expectations held out for the internet - from governments, teachers, parents and children themselves.
