By Mark A Haidekker

Elsevier Science Publishing Co Inc, United States, 2013. Hardback. Book Condition: New. 231 x 152 mm. Language: English . Brand New Book. Analysis and design methods are explained in terms of theory and practice. The book covers classical, linear feedback controls, and linear approximations are used when needed. In parallel, the book covers time-discrete (digital) control systems and juxtaposes time-continuous and time-discrete treatment when needed. One chapter covers the industry-standard PID control, and one chapter provides several design examples with proposed solutions to commonly encountered design problems. The book is ideal for upper level students in electrical engineering, mechanical engineering, biological/biomedical engineering, chemical engineering and agricultural and environmental engineering and provides a helpful refresher or introduction for graduate students and professionals. It focuses on the essentials of control fundamentals, system analysis, mathematical description and modeling, and control design to guide the reader. It illustrates the...
