

Laboratory Manual for Anatomy and Physiology

By Elaine N. Marieb

Pearson Education (US), United States, 2010. Spiral bound. Book Condition: New. 4th Revised edition. 272 x 216 mm. Language: English . Brand New Book. This full-color laboratory manual is designed for a two-semester introductory anatomy physiology course that does not require the full range of laboratory exercises found in Marieb,s best-selling Human Anatomy Physiology Lab Manuals (Cat, Fetal Pig, and Main). Though this lab manual can be used with any two-semester text, it will be most effectively used with Marieb,s Anatomy Physiology, Fourth Edition. Each lab is presented with learning objectives, cogent summaries of key concepts, and meaningful activities. These labs build your observational and laboratory skills. Review sheets are now integrated to conveniently follow each lab exercise. The lab manual also features a full-color, extensive Histology Atlas.

Reviews

The publication is easy in read through safer to comprehend. It is actually loaded with wisdom and knowledge Its been printed in an extremely simple way and is particularly simply right after i finished reading through this pdf where actually modified me, affect the way i believe.

-- Ms. Clementina Cole V

This is the very best publication i have got read until now. It is definitely simplified but shocks within the fifty percent of the pdf. You may like how the article writer create this pdf.
