Positive Intelligence measures the percentage of time your mind works in your favor instead of sabotaging you. While your IQ and your EQ (emotional intelligence) contribute to your maximum potential, your QP (positive intelligence quotient) that determines how much of that potential you achieve. After some time most attempts to improve the professional and personal life fails. Think carefully. Why are almost all new-year resolutions left out? Why back to old habits after workshops, lectures or inspirational books? Why were most people dieting succumbs to the concertina effect?.
