paperback. Book Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Paperback. Pages Number: 0 Publisher : China Water Power Press Pub. Date :2008-08-01. This book is a Design Guide series of university graduates. is one of the Electrical Engineering and Automation for the students or the relay setting calculation principles of simulation. power plant the second part of the substation and other aspects of school design topics written 6 book chapters. working closely with the characteristics of digital relay protection. relay protection introduced practical configuration and tuning details. summed up the power plants and change electrical design features of the secondary circuit and mapping methods. and a brief description of the principle of relay protection and automatic device and related method of MATLAB simulation examples. This book gives some examples of extracts designed for graduate students reference. together with graduation data in a common tool of this book primarily for electrical engineering and automation of the fresh. specialist graduates and five students can design or curriculum design as a graduate of the guide book. also available in the professional work of university teachers and technicians reference. Contents: Preface Second Edition Preface Chapter first edition Electrical Engineering (second part) graduation Overview section is designed to graduation. requirements and general principles of Section two second part of the design features of the third quarter graduation graduation preparation and implementation of the second chapter relay setting calculation of preparation failure analysis section II outlines the basics of electrical calculation short and easy way to relay the third quarter note protection and automatic device configuration options outlined in the fourth quarter relay setting calculation Four Satisfaction guaranteed, or money back.
