# INTERFERENCE PHENOMENA IN ELECTRON POSITRON ANNIHILATION

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | Future Electron Positron Collider Predictions | In this monograph predictions for parity violating symmetries have been presented that arise from the interference between strong and electroweak sectors of the standard model. The peculiar correlation between the final states arising due to the constraint of having the same quantum numbers for the final states involving weak bosons and in which the weak boson is replaced by a gluon, results in parity violating behavior which...
