REASON AND WONDER: WHY SCIENCE AND FAITH NEED EACH OTHER (PAPERBACK)

Templeton Press, 2017. Paperback. Condition: New. Language: English . Brand New Book. Often science and religion are seen as completely separate entities. Science exists in the realm of fact, whereas religion exists in the realm of faith. Conversations about genes, psychology, or even the meaning of life occur in silos. But as Eric Priest, Keith Ward, David Myers, N. T. Wright, and others show, these conversations are so much richer when both science and faith are incorporated. This is exactly what Reason and Wonder does. Eric Priest has brought together twelve of the leading thinkers in science and theology to discuss everything from the origins of the universe to evolution and evil. At the heart of each essay is an understanding that the best science--and the best theology-- are both undergirded by an appeal to reason as well as a deep sense of wonder. Each of these great scientific and theological thinkers offers a chapter on their area of expertise, and the book closes with a stimulating set of questions for group discussion or personal reflection. Contributors and their topics include: Eric Priest: Towards an integration of science and religion Keith Ward: God, science and the New Atheism Eleonore Stump: Natural law, reductionism and the Creator David Wilkinson: The origin and end of the universe: A challenge for Christianity Jennifer Wiseman: Universe of wonder, universe of life Kenneth R. Miller: Evolution, faith and science Michael J. Murray and Jeff Schloss: Evolution and evil Pauline Rudd: Is there more to life than genes? David G. Myers: Psychological science meets Christian faith John Wyatt: Being a person: Towards an integration of neuroscientific and Christian perspectives John Swinton: From projection to connection: Conversations between science, spirituality and health Mark Harris: Do the miracles of Jesus contradict science? N. T. Wright: Can a scientist trust...
