Egypt, Energy and the Environment: Critical Sustainability Perspectives

By -

Adonis & Abbey Publishers Ltd. Paperback. Book Condition: New. Paperback. 340 pages.

Dimensions: 9.1in. x 6.1in. x 0.9in. Pure environmentalism and pure resource exploitation can be

integrated together to form an encompassing sustainability solution. This is the main message of

this book based on an innovative structure-concentration-incentives methodology applied to

Egypt. This methodology provides a basis for achieving environmental sustainability based on

endogenous source-driven forces of change in contrast to the traditional effects-dominant oriented

approach. Though the books methodology could be used as a framework of analysis in

environmental sustainability research for any developing country, Egypt provides a rich case study

because of its historical, socio-economic, and political constructs. Sustainable development is

generally seen as a tradeoff between resource efficiency and social equity such that total resource

essentials in society can become sustainable in the long run in a manner that meets the needs of

current generations without compromising the ability of future generations to meet their own

needs. Environmental sustainability cannot be implemented without the direct inclusion of

structure (form), concentration (effect), and incentives (drivers) as critical policy choices because:

(1) they constitute a necessary condition in any countrys path towards sustainable development,

(2) they must be implemented simultaneously as...
