

Embedded Systems and Robots: Projects Using the 8051 Microcontroller

By Subrata Ghoshal

Cengage Learning India, 2009. Softcover. Book Condition: New. First edition. Embedded Systems & Robots: Projects Using The 8051 Microcontroller is meant to serve as a reference book on real-time embedded system design and the applications of the 8051 microcontroller for undergraduate as well as postgraduate students of computer science, information technology, electronics, instrumentation, mechatronics, and other related disciplines. The book will also prove useful to general readers who wish to understand and fabricate simple working models of robots. This book adopts a do-it-yourself approach, starting with very simple projects and slowly leading to more complex items. It includes discussions on real-time embedded systems and provides step-by-step instructions for design and construction of different types of simple robots. The book highlights the need for accurate scheduling in real-time systems and indicates the related solution-techniques through assembly language programming. It contains discussions on importance of data structures in real-time scheduling (Chapter 7) and interfacing issues of sensors such as SONAR, infrared, LDR, and tactile sensors. The book provides complete fabrication blue-prints of several robot examples, including line-follower robot, maze-solving robot, obstruction-detecting robot, shadow-activated robot, learning robot, and humanoid robot. The book uses simple and lucid language for easy understanding of the concepts involved....

Reviews

Extensive guideline! Its this sort of excellent read. it had been writtern quite properly and helpful. You can expect to like just how the writer create this book.

-- Mr. Gustave Gerhold

This book will never be straightforward to start on reading through but quite enjoyable to learn. Better then never, though i am quite late in start reading this one. Your lifestyle span will probably be convert once you complete reading this publication. -- Dr. Kadin Hane DVM
