EXE) is designed to produce pascal source code for the LCTA data recording programs for inventory and monitoring data collection using the options specified by the user. Once the source code has been produced the Borland Turbo Pascal command line compiler is used to generate executable files that can be loaded onto the handheld computers for data collection. Although a standard set of data must be collected for the LCTA program, many installations need to collect supplementary data for regional differences or installation specific needs. The LCTA handheld Options Compiler program allows installation personnel to customize the handheld program to their needs by adding additional variables. In addition, with the LCTA handheld Options Compiler program fielded at the installation, there is no delay...
