

Response Threshold Based Task Allocation in Multi-Agent Systems: Performing Concurrent Benefit Tasks with Limited Information (Paperback)

By Anshul Kanakia

Nikolaus Correll DBA Magellan Scientific, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.Collaborative processes in insect colonies such as foraging, scouting for food, and colony defense involve some form of task allocation among individual agents. This dissertation presents a novel response threshold based strategy for task allocation in multi-agent systems. It proves, using a well known result from the theory of global games, that under the constraints of imperfect knowledge of the environment and imperfect communication response threshold based task allocation leads to an equilibrium inducing strategy for the swarm system. This result provides both a hypothesis about the inner workings of a wide range of existing approaches with limited communication between agents in artificial swarm systems and also a formal explanation for threshold based task allocation in social insects. These game theory results lead to a novel continuous response threshold algorithm for multi-agent task allocation that generalizes fixed-group task allocation and stochastic team size task allocation. This allows variable team sizes to form at task sites within tolerance limits. Theory is validated by physical experiments using the Droplet swarm robot platform. Further simulation experiments provide a basis of comparison between...

Reviews

Good eBook and helpful one. It really is written in straightforward words and phrases and never confusing. I am just effortlessly could possibly get a enjoyment of looking at a published book.

-- Romaine Rippin

The book is great and fantastic. it absolutely was written very properly and beneficial. It is extremely difficult to leave it before concluding, once you begin to read the book.

-- Lyda Davis II
