

Proceedings of the Eighth GAMM-Conference on Numerical Methods in Fluid Mechanics Notes on Numerical Fluid Mechanics and Multidisciplinary Design German Edition

By Pieter Wesseling

Vieweg+Teubner Verlag. Paperback. Condition: New. 619 pages. Dimensions: 8.7in. x 6.4in. x 1.1in. This volume contains the Proceedings of the Eighth GAMM Conference on Numerical Methods in Fluid Mechanics, held in Delft, The Netherlands, September 27-29, 1989, at Delft University of Technology. This international conference is organized bi-annually at various locations in Europe by the Committee on Numerical Methods in Fluid Dynamics of the Gesellschaft für Angewandte Mathematik und Mechanik, chaired at present by W. Kordulla. At the moment, the organizing committee draws its members from ten European countries. The conference attracted a worldwide attendance of about 140 registered participants. The book contains the written versions of the 61 papers that were presented and a report on the GAMM-Workshop Numerical Simulation of Oscillatory Convection in Low-Pr Fluids held in Marseille, October 12-14, 1988. The organizing committee had a difficult task in selecting the papers from 145 submitted abstracts. In view of the high quality of the abstracts it was decided to allow more papers than in previous conferences in this series. The contents of this volume reflect current trends in computational fluid dynamics. The renaissance of hypersonic aerodynamics manifests itself clearly, strongly stimulated in Europe by the Hermes project and...

Reviews

Merely no words and phrases to describe. I am quite late in start reading this one, but better then never. I found out this ebook from my i and dad encouraged this pdf to find out.

-- Hyman Auer

I actually started out looking over this publication. It can be written in easy phrases and never difficult to understand. Your lifestyle span will probably be transform as soon as you comprehensive looking over this ebook.

-- Prof. Dayne Crist Sr.
