

Linear and nonlinear optical Zn(II)-metal-organic materials. Correlation between molecular structure, crystal structure and chemical-physical properties

Filesize: 9.24 MB

Reviews

Very beneficial to all class of individuals. This can be for those who statte there was not a worthy of looking at. Your way of life period is going to be change as soon as you total reading this article publication.
(Ebony Schowalter MD)

LINEAR AND NONLINEAR OPTICAL ZN(II)-METAL-ORGANIC MATERIALS. CORRELATION BETWEEN MOLECULAR STRUCTURE, CRYSTAL STRUCTURE AND CHEMICAL-PHYSICAL PROPERTIES

GRIN Verlag Dez 2015, 2015. Taschenbuch. Book Condition: Neu. 213x154x37 mm. Neuware - Research Paper from the year 2015 in the subject Chemistry - Other, grade: Subventionierte Projekt, University of Dortmund (Institut für Umweltforschung , Lehrstuhl für Analytische Chemie), language: English, comment: This book deals with chemistry and chemical-physical effects of Zn(II)-containing metal-organics with emergence as an interdisciplinary area of coordination chemistry, blending of electro optical and nonlinear optical materials research, optical fiber communication and optical computing technologies, data storage techniques, image processing, dynamic holography, printers, producing of harmonic generators, optical switching and limiting devices, fluorescence materials and more., abstract: This book deals with chemistry and chemical-physical effects of Zn(II)-containing metal-organics with emergence as an interdisciplinary area of coordination chemistry, blending of optical and nonlinear optical materials research; optical fiber communication and optical computing technologies; data storage techniques; image processing; dynamic holography; printers; producing of harmonic generators; optical switching and limiting devices; fluorescence materials and more. In this context, the book collects new trends, and presents for first time more recent work in the field of applied oriented design of molecular scaffolds, synthesis, optical and nonlinear optical studies of coordination compounds of Zn(II)-ion. The book is divided into four chapters. The first Chapter 1 is designed to give readers a general overview on relevance of metal-organic materials containing metal ions with completed electronic d10 configurations to mentioned above areas of applied sciences. We have chosen to introduce relationship between molecular structure and properties of zinc tris(thiourea) sulphate and its derivatives in a short Chapter 2, because of those compounds are seriously tested for an industrial scale application as NLO-phores. Chapter 3 is devoted, principally, to a correlation between molecular structure, crystal structure and chemical physical effects of Zn(II)-containing metal-organic materials, mainly part of our research work. Chapter 4 concentrates on...
