# COMPLEX NETWORK GROWING MODEL USING DOWNLINK MOTIFS

Condition: New. Publisher/Verlag: Noor Publishing | Understanding the underlying architecture of biological networks has been one of the major goals in systems biology and bioinformatics as it can provide insights in disease dynamics and drug development. Such GRNs are characterized by their scale-free degree distributions and existence of network motifs, which are small subgraphs of specific types and appear more abundantly in GRNs than in other randomized networks. In fact, such motifs are considered to be the building blocks of...
