Taylor & Francis Ltd. Paperback. Book Condition: new. BRAND NEW, Action Learning in Healthcare: A Practical Handbook, John Edmonstone, Action learning was developed in the UK in the 1960s and is now one of the most widely used development methods in healthcare. This practical manual embodies the dual focus of action learning as both philosophy and technique - exploring the underlying concepts derived from adult education and organisation development, addressing challenges and providing invaluable support material. Specifically targeting the healthcare sector, this book is divided into three parts: an exploration of core ideas and underlying assumptions including techniques and methods; practice-preparation, projects, sets, facilitation and evaluation; and a compendium of resources. Action Learning in Healthcare is vital reading for senior managers and professionals considering using action learning for leadership, management and organisation development purposes. It is also highly recommended for organisation development practitioners (with responsibility for project managing the use of action learning in local and national programmes). Action learning facilitators, too, will find much to absorb, modify and use in their own practice, as will action learning set members wishing to enhance their knowledge.
