TIMECACHERS

CreateSpace Independent Publishing Platform. Paperback. Book Condition: New. This item is printed on demand. Paperback. 444 pages. Dimensions: 9.0in. x 6.0in. x 1.9in. Timecachers is a high-tech adventure story that transports present-day characters to the Cherokee Indian Removal of 1838. Not intended as a fast-paced thriller, the story is visually descriptive and historically detailed. The title Timecachers is a reference to the game of geocaching noted by the characters. Adam Hill, is the owner-engineer of Overhill Engineering, an independent product testing company. He and his three employees, Alice Delvecci, Tom Woody, and wisecracking Salvador Lolliman, have accepted a contract to test a revolutionary navigation device--a handheld unit similar to a GPS receiver that can provide extremely precise navigational information without the need of a supporting satellite system. During field testing in the remote wilderness of northwest Georgia, they follow the device to a tiny, hidden valley where they meet John Carter, a Cherokee Indian who informs them they are now in 1838. Their initial shock and disbelief diminishes as they encounter indisputable evidence that they truly have been transported to the nineteenth century. The Timecachers are introduced to several Cherokee families and individuals who, other than exhibiting remarkably little astonishment at meeting travelers from another time, are considerably more similar to themselves than they had imagined. The Cherokee people of 1838 are highly intelligent, eloquent, sincere, and exceedingly sociable people, in contrast to the typical Hollywood portrayal of them. The Timecachers are introduced to the Tsalagi Nation, a well-organized community of cultured, spiritual people who are frustrated by the relentless encroachment of white settlers on their lands and the broken promises of the...
