Automated System for Sustainability Analysis of Die Casting

By Singh, Chandan Deep / Sidhu, Simranjit Singh

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | The manufacturing companies, now a days are looking for the solution to problems of global warming and environment degradation which arise from increased manufacturing activities. The researchers have proposed an idea of sustainable manufacturing, as the solution to the above said problems. The objective of sustainable manufacturing is the creation of manufactured products through processes that are non-polluting, conserve energy and natural resources, and are economically sound and safe for employees, communities, and consumers. The objective of sustainable manufacturing can only be achieved if there is a system that is able to measure sustainability of a manufacturing process or a product. An energy intensive manufacturing process is a good candidate for the study of sustainability. Die-casting is one such process. Therefore, the present research deals with determination of Sustainability, of a die casting part at its design stage. | Format: Paperback | Language/Sprache: english | 76 pp.

Reviews

A whole new electronic book with a new point of view. It can be full of knowledge and wisdom. It's been written in an exceedingly simple way which is only following. I finished reading through this pdf in which it really modified me, modify the way in my opinion.

-- Arianna Nikolaus

This ebook is wonderful. I have got to go through and so I am certain that I am going to likely to read through once again later on. You will like the way the article writer composed this ebook.
