MODERN SHEET COPPER PRACTICES: FOR ARCHITECTS, ENGINEERS, SPECIFICATION WRITERS, SHEET METAL WORKERS (CLASSIC REPRINT) (HARDBACK)

Forgotten Books, 2017. Hardback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from Modern Sheet Copper Practices: For Architects, Engineers, Specification Writers, Sheet Metal Workers This drawing shows the procedure in forming roof pans. Starting with a blank or plain sheet of copper, the corners are notched to cut away some of the metal that is not needed to make a weather-tight construction, and which would be troublesome in making the seams. This Operation is followed by making the reverse bends at the top and bottom edges of the sheet, then turning up the sides with their additional small bends, thus forming pans that can easily be interlocked on the roof. There the standing seams are completed by simply closing the last two bends with regular hand tools. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
