ORGANIC CHEMISTRY PLUS MASTERINGCHEMISTRY WITH PEARSON ETEXT, GLOBAL EDITION (MIXED MEDIA PRODUCT)

Pearson Education Limited, United Kingdom, 2016. Mixed media product. Condition: New. 8th edition. Language: N/A. Brand New Book. This package includes MasteringChemistry (TM) For courses in Organic Chemistry (2-Semester) A framework for organic chemistry built around the similarities in reaction types Paula Bruice s presentation in Organic Chemistry, Eighth Edition provides mixed-science majors with the conceptual foundations, chemical logic, and problem-solving skills they need to reason their way to solutions for diverse problems in synthetic organic chemistry, biochemistry, and medicine. The Eighth Edition builds a strong framework for thinking about organic chemistry by unifying principles of reactivity that students will apply throughout the course, discouraging memorization. With more applications than any other textbook, Dr. Bruice consistently relates structure and reactivity to what occurs in our own cells and reinforces the fundamental reason for all chemical reactions- electrophiles react with nucleophiles. New streamlined coverage of substitution and elimination, updated problem-solving strategies, synthesis skill-building applications and tutorials guide students throughout fundamental and complex content in both the first and second semesters of the course. This package includes MasteringChemistry (TM), an online homework, tutorial, and assessment program designed to work with this text to engage students and improve results. Interactive, self-paced tutorials provide individualized coaching to help students stay on track. With a wide range of activities available, students can actively learn, understand, and retain even the most difficult concepts. MasteringChemistry should only be purchased when required by an instructor. Please be sure you have the correct ISBN and Course ID. Instructors, contact your Pearson representative for more information.
