THE LAWS OF SOIL HUSBANDRY: THE MAKING OF COMPOST: A PRACTICAL THEOLOGY

DOWNLOAD

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 32 pages. Dimensions: 9.0in. x 6.0in. x 0.1in. This paper is not only a useful guide to the serious amateur gardener but is clear, interesting, easy to read and written by a man whose training and experience has been in agriculture, and who is, unusually, an amateur gardener too. The health of man and livestock is fundamentally dependent on a healthy soil, and a soil will only be healthy if it is biologically active. This in turn, is dependent on a proper understanding of the undeniable laws of the Organic principle, synonymous with the laws of the universe. When sound principles are adopted, we have soils which will yield healthy, sustainable growth, and a proper balance between soil, plant, animal and man. The author gives detailed practical advice on how to put these principles into practice. He talks not only of his own experience but also the experience of others. The fundamentals are clearly explained and then merge with the making of garden compost properly, the construction of bins with diagrams and photographs. This item ships from La Vergne, TN. Paperback.
