Two procedures for adjusting as-measured test-day spectra to reference day conditions the Society of Automotive Engineers (SAE) Aerospace Recommended Practice (ARP) No. 866A (866A) and a procedure utilizing pure-tone absorption equations, developed in support of the International Organization for Standardizations (ISO) 9613-1 and the American National Standards Institutes (ANSI) S1.26-1995, and refined for application to one-third octave-band data were evaluated and compared. The ISO and ANSI pure-tone absorption equations are identical to each other.
