RESPIRATION IN AQUATIC ECOSYSTEMS

OUP Oxford. Paperback. Condition: New. 326 pages. Dimensions: 9.6in. x 7.4in. x 0.8in. Respiration represents the major area of ignorance in our understanding of the global carbon cycle. In spite of its obvious ecological and biogeochemical importance, most oceanographic and limnological textbooks invariably deal with respiration only superficially and as an extension of production and other processes. The objective of this book is to fill this gap and to provide the first comprehensive review of respiration in the major aquatic systems...

Reviews

It in a single of my personal favorite publication. This is for those who statte that there had not been a worth reading. I am just easily can get a enjoyment of reading a written ebook.

-- **Myrtie Pagac**

If you need to adding benefit, a must buy book. I am quite late in start reading this one, but better then never. I am just quickly could possibly get a delight of reading through a published ebook.
