## Scheduling and Automatic Parallelization (Hardback)

By Alain Darte, Yves Robert, Frederic Vivien

BIRKHAUSER BOSTON INC, United States, 2000. Hardback. Book Condition: New. 2000 ed.. 261 x 183 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Readership This book is devoted to the study of compiler transformations that are needed to expose the parallelism hidden in a program. This book is not an introductory book to parallel processing, nor is it an introductory book to parallelizing compilers. We assume that readers are familiar with the books High Performance Compilers for Parallel Computing by Wolfe [121] and Super-compilers for Parallel and Vector Computers by Zima and Chapman [125], and that they want to know more about scheduling transformations. In this book we describe both task graph scheduling and loop nest scheduling. Task graph scheduling aims at executing tasks linked by precedence constraints; it is a run-time activity. Loop nest scheduling aims at executing statement instances linked by data dependencies; it is a compile-time activity. We are mostly interested in loop nest scheduling, but we also deal with task graph scheduling for two main reasons: (i) Beautiful algorithms and heuristics have been reported in the literature recently; and (ii) Several graph scheduling, like list scheduling, are the basis techniques used in task of the loop transformations implemented in loop nest scheduling. As for loop nest scheduling our goal is...

### Reviews

*Extensive guide for ebook lovers. It generally does not cost excessive. Your way of life span will likely be convert the instant you complete looking at this ebook.*

-- Rocky Dach

*Certainly, this is the very best work by any author. It is amongst the most remarkable publication i have got study. I am just happy to inform you that this is actually the greatest pdf i have got study inside my individual daily life and can be he very best publication for at any time.*

-- Gilbert Rippin
