

Openings by Computer Vol1. The Kangaroo Defense: The Kangaroo Defense

Filesize: 4.06 MB

Reviews

This ebook will never be effortless to get started on studying but extremely fun to read through. It is actually written in easy phrases and never difficult to understand. It is extremely difficult to leave it before concluding, once you begin to read the book.
(Pearl Corwin)

OPENINGS BY COMPUTER VOL1. THE KANGAROO DEFENSE: THE KANGAROO DEFENSE

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 104 pages. Dimensions: 11.0in. x 8.5in. x 0.2in. This is a book about chess openings that is unlike any other book in the world, and with the help of thousands of ours of computer analysis, we believe we have found the moves with the fewest losses for black. For one thing, we took our time to do the analysis right. We used multiple chess engines to play thousands of games over a period of four years and then analyzed the games using a proprietary algorithm to pick the best moves for Black, based upon the outcomes. What Roy and I showed was that that e6 is a robust and enormously flexible response against 1. d4. We simply used the computer to develop a profoundly resilient defensive system that is based upon deep computer analysis of the best responses to all of Whites best choices for first moves. (I am not a professional player, but I used this system to play Jude Acers in New Orleans to 2 draws in eight games see How I Almost Beat Jude Acers on YouTube. com). For another thing, knowing the first computer moves that have almost no losses when the computer plays against computer, and organizing these moves into our Best Response Chart, you can gain a tremendous advantage over a human opponent simply by memorizing it. Once you have committed it to memory, if your opponent makes a move that is not the best response, then you can take comfort in knowing that he or she did not respond with the best move possible. Third, this book reprints with permission an article Computer Analysis of the Relative Value of Pieces from the ICGA Journal (formerly International Computer Chess Association ICCA). This...
